SUMMARY

BCA graduate (CGPA 9.1) and MCA (AI/ML) student with hands-on experience in Python, debugging, and troubleshooting technical systems. Built and tested a LangGraph/RAG support assistant with Human-in-the-Loop review and an automated n8n research pipeline, and independently delivered and maintained live client websites. Reliable under deadlines, quick to learn new tools, and comfortable collaborating with teams and communicating progress clearly. Keen to support senior engineers on technical projects as a College Intern at Hewlett Packard Enterprise.

TECHNICAL SKILLS

- **Programming & Scripting:** Python, C++, JavaScript (ES6+), HTML5, CSS3, Git & GitHub
- **Troubleshooting & Support:** Debugging, root-cause analysis, prompt/output testing, post-launch maintenance, documentation
- **AI & Automation:** LangChain, LangGraph, RAG, ChromaDB, Human-in-the-Loop (HITL) Workflows, n8n Workflow Automation, Prompt Design
- **Web & Data:** Flask, React.js (Vite), Tailwind CSS, pandas, numpy, Scikit-Learn, Power BI
- **Collaboration Tools:** Figma, Canva, VS Code, client communication, requirements gathering, progress tracking

PROFESSIONAL EXPERIENCE

Agentic AI Intern | Innomatics Research Labs — Feb 2026 – May 2026
- Identified and troubleshot accuracy and reliability gaps in a LangGraph-orchestrated RAG customer support workflow, iteratively testing prompts to reduce ambiguous outputs.
- Implemented Human-in-the-Loop escalation logic to route low-confidence responses for human review, improving reliability in production-style scenarios.

Freelance Full-Stack Developer | Independent Client Projects — 2026 – Ongoing
- Owned end-to-end delivery of a live production website for a client (Cliniqora Solutions): requirements, build, launch on a custom domain, and ongoing maintenance and issue resolution.
- Managed a multi-workstream engagement for a surgical clinic (website, pricing tools, marketing/brand assets), working directly with the client, reporting progress, and prioritizing tasks to meet deadlines.

UI/UX Intern | Advorix Technologies — Jan 2026 – Apr 2026
- Designed wireframes and user interfaces, translating stakeholder requirements into clear, usable flows and incorporating team feedback.

Website Design and Development Intern | Internship Studio — Oct 2025 – Dec 2025
- Built responsive web pages using HTML, CSS, and JavaScript.

PROJECTS

Automated Weekly AI Newsletter — n8n, JavaScript, Claude AI
- Identified a recurring manual task and automated it with an n8n workflow that gathers, structures, and summarizes content from multiple sources, eliminating ~4 hours/week of manual effort.

RAG-Based Customer Support Assistant — LangChain, LangGraph, ChromaDB, Python
- Built a Python assistant combining PDF ingestion and vector search with a LangGraph workflow for query routing and multi-step reasoning; added HITL review to catch low-confidence responses.

SecuSafe – Security-as-a-Service Portal (Final Year Project) — React.js (Vite), Flask, Scikit-Learn
- Built a full-stack portal detecting phishing/malicious URLs in real time, combining rule-based heuristics with an ML model targeting >90% detection accuracy; included a scraping/feature-extraction pipeline and a Telegram Bot for cross-platform verification.

EDUCATION

Master of Computer Applications (MCA) – AI/ML (Distance Learning) — 2026 – 2028 (Pursuing)
Bachelor of Computer Applications — Dr. Manmohan Singh Bengaluru City University | CGPA: 9.1 — 2023 – 2026

CERTIFICATIONS

Prompt Engineering & Programming with OpenAI — Columbia University | Data Analytics Job Simulation — Deloitte Australia (Forage) | JavaScript Essentials 1 — Cisco
